

Note:
According to MAX 10 pin connection guideline PCG-01018-1.2, "Tie the VCCINT pin to any 1.2V power domain if you are not using ADC."
Therefore, connect VCCINT to 1.2V CORE for DC or DF production device migration.

Note:
According to MAX 10 pin connection guideline PCG-01018-1.2, "Tie the VCCA ADC pin to any 2.5V power domain if you are not using ADC, and do not tie the VCCA ADC pin to GND."
Therefore, connect VCCA ADC to 2.5V CORE for DC or DF production device migration.

Note:
For ES device, connect ADC VREF to NC when not using external voltage reference.
For DC/DF production device, ADC VREF pin is migrated to VCCA according to MAX 10 Errata.

Notes:
Place a 0.1uF capacitor close to each MAX 10 VCCD pin.

< DC cap >
- "FPGA, IC" 전원 단자에 가장
근접한 곳에 장착할것
- 수량 부족시 추가 요망
